## Principal's Note

Hi,

We are really excited to get going with this new school year. I wanted to focus this message on support we are receiving from LCSD #2. The school board approved a renovation to our weight room. A new CES playground expansion has been funded through our local PTO. Additionally, the district funded a new sidewalk at CES and new scoreboards with shot clocks for our main high school gym. Please take a minute, if you see a school board member or district office staff member, to thank them for their support.

This summer a renovation was completed to our weight room. This renovation removed a wall between the weight room and the old science room. This significantly increases the usability of the space. A drinking fountain was also added in the weight room that will help ensure our students are able to stay hydrated. New flooring was added to the space, with the asbestos from the previous tile that was covered by carpet or soft flooring being mitigated. New HVAC was added to the space and the space was painted to match the lower gym. This adjustment will enhance our ability to help meet student needs.

At CES a sidewalk was added to make it so students can now take their bikes on the sidewalk rather than needing to go into the street or across the grass. This will enhance safety for elementary students who ride bikes or go out into the neighborhood to get home. Our PTO has been raising funds for several years to add to the playground. This addition is occurring right now. Stuart Peterson was awarded the contract and is replacing all basketball hoops at the elementary. One court will have adjustable hoops that will allow them to be dropped down for early elementary grades as needed at recess. This will allow students to practice on age-appropriate hoops. Additionally, a gaga ball pit is being added next to the basketball court. This is one of the most popular new games at elementary schools across the country. Mrs. Moyes will be teaching our students how to play. Finally, a professional volleyball net system will be installed. It will be a grass court but will have removable standards that are high quality and will allow students to practice volleyball on a correctly sized net during recess if they would like. Thank you to our PTO and LCSD #2 for making this happen.

The score boards in the main gym were replaced about a week ago. The new score boards have our panther logo and are equipped with shot clocks. The WHSAA adopted shot clocks for competitions during the 2026-2027 school year. This will give our P.E. classes and basketball teams plenty of time to prepare for next year's season and this adjustment. This was completely funded and approved by our school board.

If you get a chance, please reach out and thank our school district office and school board for their support in improving offerings at both schools.

Sincerely,

Kenneth Dietz

Cokeville K-12 Principal
